

Description

Low impedance
 Low ESR
 Wide frequency range
 Wide operating temperature range

Applications

Power supplies
 Consumer electronics
 Industrial electronics

Electrical characteristics

Operating temperature: $-25^{\circ}\text{C} \div 85^{\circ}\text{C}$
 Rated voltage: $400\text{VDC} \div 450\text{VDC}$
 Rated capacitance: $100\mu\text{F} \div 940\mu\text{F}$
 Capacitance tolerance (at 100Hz, 20°C): $-20\% +20\%$
 Dissipation factor (at 100Hz, 20°C): $0,15 \div 0,18$
 Leakage current (after 5 minutes application of rated voltage): $I = 0,005.C.U$
 I - current [μA]
 C - rated capacitance [μF]
 U - rated voltage [V]

The aluminum case capacitors are supplied with PVC sleeve insulation and a safety vent located on end-deck.Plus pole is marked on the perimeter

Load life:

Load life is 2000 hours (at maximum operating temperature, at rated voltage and AC current load as per Table 1).

After 2000 hours of the above application of rated voltage and current load, capacitors must meet the following characteristics requirements:

Capacitance change $\leq \pm 15\%$ of initial value

Tan $\delta \leq 150\%$ of initial value

Leakage current \leq initial value

AC Load:

The maximum AC load at maximum operating temperature (85°C)is given in Table 1. The AC load can be increased at lower operating temperatures by coefficient as per Table 2, with capacitor life expectancy unaffected.
